SECTION I. COMPANY BACKGROUND

Abila Security & Investigations, Inc. (ASI) a certified SBA 8(a) firm, is a world-class security, investigative, intelligence, training and forensic consulting company that is committed to providing the highest quality of customized services and solutions for the U.S. Government, the private sector, and the private individual. ASI was established with the awareness and forethought of our nation's changing times, in which the need for intelligent security measures in all areas of government, corporate America and our private lives is no longer an option, but rather a necessity for survival.

ASI has a dedicated, highly trained team of security, investigative, training and forensic consulting professionals that possess extensive backgrounds and training from a variety of Federal, State, and local intelligence and law enforcement agencies, the United States Military and (from) the burgeoning fields of forensic psychology and forensic science. ASI's experienced team of accomplished protection agents, consultants, training officers, investigators, threat management and forensic specialists have the ability to design, implement, and manage comprehensive world-wide threat assessments, protection programs and investigations for our clients.

ASI's stringent hiring practices ensure that we provide our Clients with the most talented, qualified, and trained security, intelligence, investigative and forensic professionals available. Our depth of expertise encompasses a wide range of disciplines and has been honed by years of real world experience. We integrate that knowledge and skill into every project, using cutting edge tactics, techniques and procedures that are proven worldwide.

ASI utilizes our resources to obtain the most accurate, up-to-date information for our Clients' security, investigative and forensic needs. Our cadre of professionals has the knowledge and expertise to provide our Clients (worldwide) with the critical information to make informed decisions that directly affect business opportunities, corporate assets, corporate personnel and the safety and protection of family members on a global level.

We work cooperatively with our Clients to focus on their security and investigative needs to develop best value solutions. ASI continually evaluates its operating procedures and ongoing operations to maximize the effectiveness and quality of service to our Clients.

VISION – *ASI strives to be the most operationally sound, tactically trained and professionally discreet Security and Intelligence Services Company in the world.*

MISSION – *Provide our clients with a discreet one-stop shop for all their (security) needs. Whether it is a security, training, investigative or forensic issue or a tactical product need, such as armored vehicles, ASI provides efficient, expert and expedient solutions.*

SECTION II. CORE SERVICES

ASI has extensive experience in providing executive protection, investigations, training and forensic consulting in domestic and international environments. Our experience has come from direct contracts with U.S. Government agencies, Fortune 500 companies, financial institutions, law firms, major utility companies and private estates. ASI's corporate core services include:

Executive Protection – ASI recognizes that not every client needs presidential-level security. The appropriate level and style of security can be assessed and determined to fit each distinct environment and need. Each protection team, like each Client, is unique and should be treated as such. ASI initiates each security program by performing a Personal Security Vulnerability Assessment (PSVA). This, along with the desires of the Client/Protectee, gives the Security Team a foundation in which to provide an appropriate level

of security, be it low/high profile or low/high threat. Our purpose is to provide the Protectee a secure environment so that he/she/they can live and carry out day-to-day life without interruption, concern, or fear.

ASI operators pride themselves on anticipating every possible contingency and obstacle and being able to explain them to our Clients in our Client briefing. We go through the findings of the PSVA with the Protectee and his/her family. This briefing opens a dialogue and enables our Protectees to voice their concerns about flexibility, privacy and other issues. We explain the importance of the logistics involved with security advances, duress codes, agent responsibilities, confidentiality, hospitals, schedules, and evacuation plans. All information and logistics that are involved with Executive Protection are discussed in an open forum. We want our Protectees to feel they can come to us with any problem and the professionals at ASI can handle them quickly and discretely.

We have highly trained and experienced operators all over the world, many of whom are multilingual and multicultural. They are highly trained, have real world experience and are ready to launch at a moment's notice. ASI custom fits each Client with an Agent or protective team that we feel will be most compatible with the venue and the Client themselves.

Corporate Security – ASI is committed to the highest level of integrity while building and nurturing a culture of trust. Our security efforts are focused on three areas, which are the essence of Corporate Security:

1. Safeguard people, property, information and their assets.
2. Partnership with our agents, our clients and their vendors.
3. Protect client value and preserve our reputation by supporting the highest standards of ethical conduct.

Threat & Vulnerability Assessments – Our experience in designing and implementing complete security packages and performing both visible and low profile threat and vulnerability assessments, to include Personal Security Vulnerability Assessments (PSVAs), is second to none. Through thorough field work, along with science and technology, we develop capabilities that enable the creation, application and dissemination of knowledge to anticipate, prepare for, detect and prevent a myriad of critical incidents.

We begin with an “entrance briefing” and identify strategic objectives for each individual and/or location – whether it is for a work, home and/or travel environments. We then conduct the threat/vulnerability assessment to support the agreed upon objectives. With a completed assessment, we are able to determine the potential impact to the client and/or geographic location. Upon determining the potential impacts on each client and/or location, we create a working set of recommendations. Finally, we work with the client to implement each recommendation, mitigate the risks and “harden” the vulnerabilities. The client is informed and involved every step of the way.

Department of Homeland Security

Chemical Facility Anti-Terrorism Standards (CFATS) COMPLIANCE INSPECTIONS

Provide expert support to achieve CFATS security requirements. ASI can serve(d) as subject matter experts of DHS/CFATS in taking the facility from the Security Vulnerability Assessment (SVA) to a Site Security Plan (SSP) by analyzing gaps in existing countermeasures against the CFATS Risk Based Performance Standards (RBPS).

ASI has experts who can design cost- effective security solutions to meet all RBPS at each tier and to assist in the development of a suitable Site Security Plan. We can act as your preparer and save you the time it takes to fill out the lengthy online template to document your SSP.

There are 18 RBPS that range from securing the site, to training, recordkeeping and coordinating emergency response and crisis management. ASI can advise you and assist your firm in developing measures that satisfy the RBPS and can result in “layers of protection” and individual

measures that may help a facility meet more than one RBPS. ASI professionals are experts at designing cost-effective, resource efficient, well-organized plans that document coordination among existing plans, incorporate new measures needed to fill CFATS-specific gaps and meet your compliance needs. We have written security and emergency response plans for a wide variety of industries.

Investigations – Our investigative team is comprised of proven leaders in the discreet acquisition of intelligence. From a basic public records search to an expansive in-depth inquiry, every case is handled professionally and tailored to meet the needs of each individual client. Privacy and discretion are imperative when operating in the field of investigations and intelligence gathering; thus, each request or inquiry that ASI receives is treated with the utmost respect and confidentiality.

ASI's intelligence and investigative capabilities are vast and include the following specialized areas: Missing Persons, Kidnap and Ransom, Background Checks, Surveillance and Counter Surveillance, Surveillance Detection, White Collar Crime, Corporate Internal Investigations, Pre-employment Screening, Criminal Investigations, Covert Assessments (Red Teams), Target Analysis, Interviewing

and Depositions, Narcotics Investigations, Investigative Due Diligence, Asset Searches, Ownership Searches, Competitive Intelligence, Sensitive/Discreet Undercover Work, Negotiations, and Narrative Analysis.

ASI's investigative team is comprised of top-notch specialists from a wide range of disciplines, including the Federal Bureau of Investigation, U.S. Secret Service, Department of Defense, Department of State, and state/local law enforcement agencies. ASI's investigators are usually multilingual and multicultural, boast decades of international experience in critical and sensitive venues and many of them possess active security clearances.

Forensic Consulting Services - ASI's Forensic Consulting Services are divided into two unique and demanding fields of expertise – Forensic Psychology and Computer Forensics.

Forensic Psychology

Forensic Psychology is the interface between psychology and the law. It examines aspects of human behavior directly related to the law and the practice of psychology within the legal system. Forensic Psychology is interdisciplinary in nature, drawing on diverse disciplines such as the law, sociology, political science, anthropology, philosophy, medicine and linguistics. ASI offers Forensic Psychology services that are both clinical and legal in nature.

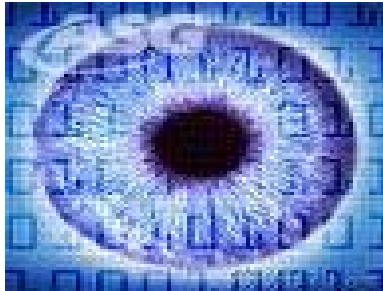

From a threat assessment on a stalking case to a kidnap and ransom situation, ASI has the resources to help our clients resolve delicate and complex issues.

- Stalking and Stalking related issues
- Workplace Violence Consulting and Prevention
- Psychological Assessment and Reports
- Critical Incident Stress Debriefing
- School Violence Consulting and Prevention
- Crisis Management Consulting
- Competency to Stand Trial Assessments
- Kidnap and Ransom Cases
- Expert Court Testimony
- Narrative Analysis
- Witness Preparation

We assist our clients in preventing or managing high-risk employee behavior problems by providing Human Resources (HR) support, security and threat-related consulting, seminar training and corrective coaching. ASI experts speak, write, consult and train on tough HR topics such as workplace violence, sexual harassment, conflict resolution and stress management. They draw on their clinical, field experience and research expertise to ensure our clients the most professional and reliable level of service.

Computer Forensics

Computer Forensics is an expertise that unravels the electronic intricacies involved in everything from examination of a single computer to complex litigation. ASI's Computer Forensic services encompass every aspect of the electronic discovery process. When you are entangled in litigation or an internal investigation is underway, computer forensic analysis can make a major difference in the outcome. The evidence you recover must

stand up in court or in an internal hearing, which means you should not ask untrained staff to examine computers, cell phones or PDAs.

Computer Forensic experts are the tactical units of the new millennium; they use state-of-the-art methodologies with the latest technology to provide the evidence you need to solve electronic-related company investigations and legal/courtroom issues.

- In-depth Internet Investigations
- Computer Evidence Recovery
- Domestic and International Data Capture
- Forensic Accounting
- E-risk Management

- Expert Court Testimony
- Keystroke Tracking

Our Forensic consultants are not office-bound academics. They are practitioners in their fields, with many having multidisciplinary backgrounds in security, law enforcement, protective intelligence, threat assessment and management, as well as computer science and technology. Our consultants teach, train, publish, and keynote speak in their respective areas.

Training – With the rise of global terrorism and with security measures being heightened worldwide, new and daunting security challenges have been put on government officials, business executives, travelers and, in particular, security and protection specialists. ASI takes the responsibility for the training of these individuals very seriously.

ASI is committed to providing premier training that anticipates and fulfills the ever evolving needs of the U.S. government and private security industry in both the domestic and international arenas. We teach people

how to avoid danger, keep their workplaces safe, to travel without incident and to protect themselves, their clients and their critical infrastructure.

The training cadre at ASI is comprised of an impressive array of cleared instructors with backgrounds in military Special Operations Groups, U.S. Secret Service, U.S. DoS, U.S. Marshals, other Federal and local law enforcement agencies and high-level intelligence agencies. The training division is a detail-oriented research and curriculum development group, dedicated to keeping abreast of the most progressive real world tactics, techniques and procedures that address the myriad of real world situations and needs our Clients may encounter. In addition to our course offerings, ASI conducts tailored, specialized intelligence training to meet the needs of our Clients. Our courses can be taught at your site or in numerous places around the country.

From the DC metro area to California, we have training facilities that will meet the most rigorous standards and privacy requirements. Whether the training is done at your location or any of our facilities in the California or Washington DC area, we pride ourselves on knowing that it will be the best course available. Contact ASI for current course offerings.

Section III. PAST PERFORMANCE

Contract	Description
Hashemite Kingdom of Jordan	<p>Prime contractor as a Subject Matter Expert for the Antiterrorism Assistance Program (ATA) on National Leadership Security and Diplomatic Community Security. Conducted law enforcement and anti-terrorism / counter-terrorism Needs Assessments for the Kingdom of Jordan.</p> <p>Conducted a capabilities assessment of the Royal Guard, which is the special military unit created to protect the King of Jordan, the Royal Family and the Prime Minister of Jordan.</p> <p>Conducted a capabilities assessment of two special police units – the Diplomatic Security Brigade (DSB) and the Close Protection Unit (CPU) – which were created to protect foreign ambassadors living in Jordan, their embassies and residences as well as government buildings and critical structures.</p>
Palestinian Authority	<p>Prime contractor as a Subject Matter Expert for the Antiterrorism Assistance Program (ATA) on National Leadership Security and Diplomatic Community Security. Conducted law enforcement and anti-terrorism / counter-terrorism Needs Assessments for the Palestinian Authority.</p> <p>Conducted a capabilities assessment of the units within the Special Presidential Security Guard (SPSG) which were created to protect the National Leadership of the Palestinian Authority - the President of the Palestinian Authority, Presidential residences and offices and Palestinian Authority facilities in the West Bank and Gaza.</p> <p>Conducting a capabilities assessment of the units within the Special Presidential Security Guard (SPSG) which were created to perform Diplomatic Community Security, focusing on protecting visiting dignitaries, diplomatic facilities and foreigners in the West Bank and Gaza.</p>
HQ US Army Special Operations Command	<p>Provided all instructors, training areas, and supplies (not otherwise identified as Government furnished) required to train students for off road tactical vehicle employment/operation in HMMWV training in a desert and high arid mountain environment similar to the Middle East AOR. Training included all basic tactical HMMWV operation skills with training focused on enhancing the survivability of the operator while engaged in SOF operations.</p> <p>Subjects/Courses taught were: Basic level operator maintenance of vehicle, Training for immediate Action Drills, rollovers and recovery, defensive driving techniques, Brake/throttle modulation, ascending & descending obstacles with a vehicle, Basic land navigation, night Device driving, Basic terrain negotiations, disabled vehicle recovery etc.</p>
U.S. Embassy- Bogotá, Colombia	<p>Presidential Security Program (PSP) Instructors – provide VIP Protection training under the auspices of the U.S. Embassy in Bogotá, Colombia under the U.S. Department of State’s Presidential Security Program for the protection teams of the President, Vice President, and Minister of Defense of Colombia and the Mayor of Bogotá.</p> <p>Subjects/Courses taught were: Principles of Protection, Explosive Sweeps, Advances, Defensive Tactics, Terrorist Operations, Walking Formations, Motorcade Operations, Counter Terrorist Driving, Surveillance Detection, and Firearms Training.</p>

<p>U.S. Department of State Anti-Terrorist Assistance Program</p>	<p>Provided support to the ATA program to achieve multiple objectives in the war on terrorism. ASI support to the ATA program improved the operational and tactical capabilities of our host nations capabilities to confront and defeat the threat of terrorism. The ASI training enhanced and sustained our nation’s capacity to destroy terrorist networks and prevent attacks. Through the training provided by ASI under the ATA program improved our host nations to serve as force multipliers to bolster our own efforts to defend American citizens, U.S. business, and U.S. Government interests abroad. The ATA program, with the support of ASI, has been a key part of our nation’s first line of defense in protecting the American homeland.</p>
<p>United States Air Force Pacific Command (PACAF)</p>	<p>Support to the Pacific Air Forces (PACAF) represents our most active support to the Global War on Terrorism (GWOT). Since early 2006, ASI has provided assessment, risk management, planning, training, and exercise support: This program was established as the Expeditionary Combat Skills Training Program (ECST). The ECST mission was predicated on a requirement that grew out of the Global War on Terror (GWOT). GWOT combines the elements of counter insurgency, counter guerrilla, and both anti- and counter-terrorism.</p>
<p>United States Postal Service</p>	<p>Provides training support to the United States Postal Service to assist them in their requirements for comprehensive emergency management plans. The Postal Service comprehensive emergency management plans have been developed to meet the requirements addressed within the National Incident Management System, the National Response Plan, and Homeland Security Presidential Directives 5, 7, and 8, which specifically addresses an “all hazards” approach for preparedness towards domestic terrorist attacks, major disasters, and other emergencies in association with Capabilities-Based Planning. The platform for this preparedness is the instruction provided by ASI in the vulnerability and assessment tool CARVER.</p>
<p>White Sands Missile Range</p>	<p>Information concerning the award of this contract is considered to be of a sensitive nature and cannot be disclosed at the current time.</p>
<p>Red Team Cyber Security Assessments</p>	<p>ASI performed physical security assistance as it applies to the protection of utility cyber systems during a collaborative survey where the survey group looked for actual or potential systemic and/or procedural shortcomings that could negatively impact the safe and secure operation of the utility. ASI also conducted hostile planning during a reconnaissance survey, followed by various covert breaches into utility facilities.</p> <p>ASI also worked with the utility company in the collaborative phase of the project in order for the utility to recognize their vulnerabilities and work to harden the targets.</p>
<p>Judicial Escort Program</p>	<p>ASI provides armed security escorts for United States District Judges to official and private venues throughout the state of California. ASI Provides all the logistical support for each movement with route reconnaissance, security advance and contingency plans.</p>

Department of Homeland Security Chemical Facility Anti-Terrorism Standards (CFATS)	Provided expert support to achieve CFATS security requirements. Served as subject matter experts of DHS/CFATS in taking the facility from the Security Vulnerability Assessment (SVA) to a Site Security Plan (SSP) by analyzing gaps in existing countermeasures against the CFATS Risk Based Performance Standards (RBPS). ASI has experts that designed a cost-effective security solution to meet all RBPS at all tiers and to assist in the development of a suitable Site Security Plan. Acted as the firms "Preparer" in documenting their SSP.

SECTION V. CONCLUSION

ASI has an extensive history of supporting Clients worldwide – in any geographic location – be it Beverly Hills or Bogota, Colombia. ASI is a widely diverse organization spanning a multitude of services, products, programs and operational support and management.

ASI will become, intimately aware of the specific corporate culture of our Clients; this is the key to our uniqueness and our success. This is what makes ASI the security and intelligence company to carry out any mission. Our past performances will give you a solid indication of our capabilities.

ASI's implicit understanding of government, commercial and executive security needs and requirements, through both current and prior contracts, enables us to provide a professional, safe and secure environment to our Clients. ASI focuses on peripheral issues, allowing our Clients to focus on their day to day lives without interruption.

The goal of ASI is to develop long-term Client relationships, not just short-term, one-time projects. We work cooperatively with our clients to focus on their security, investigative, training and forensic needs to develop best value solutions. ASI continually evaluates its operating procedures and ongoing Client operations to maximize the effectiveness and quality of service to our Clients.
